Professional Summary

Software Engineer with experience in backend development, Linux systems, and scalable platform engineering, including 1+ year at Cisco working on IOS-XR, debugging, validation, CI/CD automation, and production issue resolution. Skilled in Python, Java, C++, REST APIs, distributed systems concepts, and AI-integrated application development with hands-on experience building scalable backend services and automation workflows.

Skills

Languages: C/C++, Python, Java
Frameworks: CMocka, Django, Spring Boot
Databases: SQL/PostgreSQL, MongoDB
Systems: Linux, Command Line, RPM, Virtualization, System Programming
DevOps & Tools: Docker, CI/CD, Git, Jira, GitHub Copilot

Experience

Cisco Systems Pvt. Ltd.

Bangalore, Karnataka, India

Software Engineer Trainee

Nov 2024 – Nov 2025

- Contributed to **Cisco IOS-XR** on **Linux**, handling feature validation, defect fixes, system integration, and platform-level debugging across networking components.
- Worked on **Sandbox, AppMgr, and HealthCheck** modules to improve platform reliability, operational monitoring, and software stability.
- Built automated validation and testing workflows using **CMocka** and integrated them into **CI/CD pipelines** using YAML-based configurations, reducing manual effort and improving regression coverage.
- Resolved critical production issues through debugging, log analysis, and root cause investigation, reducing downtime by **30%** and improving system reliability.
- Fixed and resolved **250+ static analysis issues**, improving code quality, maintainability, and compliance with engineering standards.
- Collaborated with cross-functional engineering teams in Linux-based development environments to validate features, troubleshoot defects, and deliver stable software releases.

Projects

FinBuddy | Python, Django, REST APIs, AI Integration

February 2026

- Developed a scalable Django-based backend platform for accounting, inventory management, and business transaction tracking with secure role-based access control and RESTful workflows.
- Integrated an AI-powered automation assistant using **LLaMA-based models** to process natural language inputs and automate financial record management workflows.
- Designed backend workflows for automated transaction parsing, structured data storage, and real-time financial data management, improving operational efficiency and accuracy.

RAYCHESS | C++, Algorithms, Computer Architecture

October 2025

- Built a high-performance C++ chess engine using 64-bit bitboards and Minimax with Alpha-Beta pruning, optimized for cache locality and fast move evaluation.

Education

Amity University, Noida, Uttar Pradesh

CGPA: 8.1

Master of Computer Applications

2024 – 2026

Guru Gobind Singh Indraprastha University, Dwarka, Delhi

CGPA: 8.9

Bachelor of Computer Applications

2021 – 2024

Certifications & Workshops

- Certificate in Artificial Intelligence** — Amity University. *Credential ID: Fn6CqLDa9G.*
- Workshop of CCNA** — Cisco: Specialized training on routing protocols and network simulations.

Achievements

- Recognized as **Quality Exemplar of the Month** at Cisco (July 2025) for consistently delivering high-quality work and driving team excellence. [Link](#)
- Solved **400+** Data Structures and Algorithms problems across multiple platforms, demonstrating strong algorithmic thinking and consistency.
